

Data Bootcamp: Class #1

Revised: April 14, 2015

Overview

- Data. We live in a world that's ...
- Programming. To make sense of the data, you need to be able to code: to write computer programs to put the data in a form that ... Be forewarned: you are expected to write programs in this course. This can be incredibly frustrating and requires enormous patience. If that's not your thing, you should not take this course.
- Graphics.

What I expect:

Work. Code.

Background. My target audience is one with minimal coding experience.

1 Trigger warnings

Patience...

Need to work outside of class
